support

The overarching aim of this project is to support funded ELC settings across Scotland to improve the quality of ELC provision and meet the National Standard. The programme focuses on providing targeted support to those settings not currently meeting, or at risk of not meeting, the National Standard.

Universal support

Introduction the new ELC Quality Framework

Regular social media updates

As well as providing targeted support, the team have recorded sessions and created a number of universal resources to support the wider ELC sector. These resources have been designed to allow services to select and view sessions from a menu which can be viewed in their own time.

Feedback

#ELCImprove

ELCImprove@careinspectorate.gov.scot

"I found them helpful as they were short, to the point videos which contained clear information"

"The ability to discuss with peers and share information. Availability of improvement officer for discussion"

"Being part of a community has allowed me to share practice and ideas with other settings has helped me to look at small changes and not be overwhelmed with the bigger ones building on the changes and understanding that, it is ok you need to start small to make big changes. Communication with all ie staff, children and parent/carers is very important to implement change and I now feel confident in that."

"Presentations have been easy to follow and explained well throughout. I enjoy taking part in break out rooms to engage in discussions with others in a similar situations and share ideas/ experiences. Also helped seeing/ hearing about an example of an aim, change idea and how the whole cycle works."

"These were absolutely fantastic thank you. They were clear, concise and gave the key messages. In a busy world these provide us with a clear reminder to keep focussed on Quality. They really are Quick Wins!"
